Mopar Muscle Cars of Austin

June 2003

Mopar Muscle Cars of Austin is a non-profit organization formed September 1986. The MMCA is "Dedicated to the restoration, preservation, and promotion of Chrysler built products." Monthly club meetings are currently being held the first Tuesday of every month at 6:30 PM Gethsemane Lutheran Church, Austin, Texas, located at 183 and Georgian Drive next door to the Humane Society.

The MMCA is open to all persons of good character. Yearly membership dues are \$25.00 per person. As a member, you receive a newsletter with free newsletter classifieds, a discount on parts at participating vendors, access to a network of Mopar parts and paraphenalia, and become eligible to attend club functions as well as show off your Mopar. Non-members may place an ad in the newsletter for a \$5.00 donation. Copies of the newsletter are available for a \$1.00 donation.

2001-2002 Club Officers

Office	Name	Phone	E-mail
Co-Presidents	Dave Haight	(512) 346-3298	haight@ev1.net
	Dean Haight	(512) 346-3298	haight@ev1.net
Vice President	Ed Sewell	(512) 326-2592	wiking5@netzero.net
Events Director	Steve Lacker	(512) 442-1871	slacker@arlut.utexas.edu
Membership	Chris Ryon	(512) 833-5158	Chris.Ryon@parsons.com
Treasurer	Harry Amon	(512) 345-5832	theamons@yahoo.com

Editorial

A special note to all the members in P-Ville. Early last month I had dinner at Baby A's on Howard Ln. As luck would have it, some bozo broke into my truck and made off with my tool box. I found out that this is becoming very common in this area. Please be careful if you have to go to this Baby A's or Home Depot.

Andrew at MarketPlaceAustin has asked us to put on another show around October. If any one would like to lead the car show team, please let me know.

Last Month

This past month, we had the annual MMCA picnic at Northwest park. A small group turned out to the park. With the sad looking weather (and poor announcements from me) the picnic was still a blast. Thanks to everyone who made it out.

This Month

Well, as you may or may not know, I had some problems getting last month's newsletter out on time. I hope to fix that problem. From now on, they should be out the first week of every month.

Dues Blues

Please remember to take a moment to send in your dues.

Automotive News

You've seen the concept—now how 'bout a glimpse of the real deal? Here's our spy guy's shots of the forthcoming 2005 Dodge Magnum SRT-8 sportwagon in production trim undergoing testing at Chrysler's Arizona test facility. While the concept revealed in Los Angeles featured a 430-horsepower supercharged 5.7-liter Hemi V8, the production model due in early 2004 will likely hit the market with a 340-hp Hemi under the hood.

Magnum and a sister Chrysler model based on the 300C concept shown last month in New York represent Chrysler's next-generation front-engine, rear- and all-wheel-drive LX replacements.

The cars borrow some 20 percent of their parts from Mercedes, including suspension, transmission and steering hardware. A third potential LX model, the Airflite concept that debuted in Geneva, is a five-door sport hatchback powered by a 3.5-liter V6 driving the rear wheels.

Chrysler Historical Timeline

1992 Chrysler introduces the Dodge Viper, a 2-seat V-10 roadster, Chrysler's first vehicle designed by a platform team.

1996 Chrysler breaks ground for the Chrysler Historical Museum.

1996 Chrysler introduces the Plymouth Prowler.

1996 Chrysler is named "Company of the Year" by Forbes Magazine.

1996 IndustryWeek named Chrysler among the 100 best managed companies.

1998 Chrysler and Daimler-Benz AG agree to combine their businesses in a merger of equals.

Fuel-Saving Tips Part 1

<http://autos.msn.com/advice/standardart.aspx?contentid=4018909&src=News>

No matter where you live and what you drive, you can maximize every gallon of fuel. Here's how:

Regular Servicing Is Important

Keep your vehicle well maintained with regular servicing to keep it operating at peak efficiency. An inefficient engine—with fouled spark plugs, for example—won't make optimum use of fuel. Be sure the air filter and the fuel filter are clean. Put in new ones if they're not. A new oxygen sensor alone can improve gas mileage by as much as 15 percent, according to AutoZone, a car parts store. Don't forget little things like the air in your tires. Having tires inflated to the maximum recommended pressure can improve gas mileage by as much as 6 percent, while periodic wheel alignments can help improve fuel economy up to 10 percent, according to the U.S. Environmental Protection Agency. Clean out that trunk, cargo area or pickup bed. Take out unneeded items that only add weight to your vehicle. Extra weight decreases gas mileage. According to AutoZone, every 200 pounds of unnecessary weight shaves one mile per gallon off your fuel mileage.

Be a Different Driver

Change your driving style. Accelerate gradually, drive smoothly and with care and you could see as much as a 20 percent gain in fuel economy compared with what you'd get with an aggressive driving style, the EPA says. Skip those jackrabbit starts and sudden pedal-to-the-metal maneuvers if you want to save gas. Anticipate stops so you avoid sudden braking, and take a long view of the road ahead, coasting safely to an intersection in front of you where you see traffic stopped.

Don't speed. A car or truck moving at 55 miles an hour can get about 15 percent better fuel economy than the same car going 65 mph. Use your vehicle's navigation system, if you have one, in your travels to new locales. This can save you from getting lost and wasting gas. (Editors note: Yeah, that's going to happen ☺)

Drive Smart

Don't be idle too long. Don't waste fuel by sitting in that drive-thru lane at McDonald's or Taco Bell. Park and go inside instead. Don't let your vehicle idle as

you wait outside the elementary school to pick up your children. Idling uses more fuel than turning the engine off, waiting for your youngsters and then restarting the engine.

When you're in slow city traffic, keep the air conditioner off, if possible. Roll down the windows and open the air vents to keep you and your riders comfortable. That air conditioner is a burden that uses fuel, and if you're tooling around town, you can see a "very slight" improvement in gas mileage by keeping it turned off, a Mercedes-Benz spokesman said.

Plan Ahead

Combine your errands into one trip, rather than taking multiple trips from home. Organize your stops so they're near each other and so you don't retrace your path. You may even be able to park in one central spot and walk between some of your stops rather than driving and parking at each one. For large gatherings like family reunions and church picnics, organize a carpool. If the distance to these events is long, Budget Rent a Car Corp. suggests even renting a 15-person van to maximize fuel savings vs. driving a number of separate vehicles in these circumstances.

Plan your trips so you go out during less-congested times of day. When there's less traffic, you're more apt to be able to drive smoothly. Use navigation aids on the Internet or in your vehicle to keep from getting lost—and thus wasting fuel—when you're headed to a new, unknown location.

Weather Effects

Note that road and weather conditions have a role, too, in the fuel economy of your vehicle. Driving into a 20-mph headwind can reduce fuel economy by as much as 6 percent. Driving up a mountain road with a 7 percent grade can cut fuel economy by as much as 25 percent. Driving on gravel and in slush and snow requires a bit more fuel, too.
